Kieffer Ergonomic Snaffle Bridle

This has to be the best bridle my horse has ever worn. The 'Comfort Factor' is second to none and I am so pleased I got to test it. My horse is very sensitive in the poll area and becomes very tense so it was affecting her performance. While wearing the bridle I noticed a dramatic difference straight away, she became more relaxed and started to work in a better outline due to the very soft padded headpiece and, because the nose band strap passes over the top of the headpiece causing less poll pressure. The bridle also has a padded nose band again adding extra comfort and it is also perfectly made from quality leather which makes the bridle look very smart. The reins that come with the bridle are also very well made and offer excellent grip. The bridle has totally changed my horses way of going and I absolutely would never use another bridle again!

Mountain Horse Emily Polo

The Polo is very fashionable and I love the embroidery detail of the 'reins & snaffle' which adds great style. The top is really soft and easy to wear while riding, around the yard and even looked good with a pair of jeans! The Polo features slit vents at the side which allowed for ease of movement and 4 collar/chest buttons. The polo washed very well and retained it's shape, this is definitely a polo I will be living in this summer and the price is fantastic too at only £24.50. A very fashionable bargain that is very well made and extremely stylish!

Nomad 18volt Cordless Pressure Washer

I really don't know how I managed without this ingenious piece of equipment. This cordless pressure washer is great for absolutely everything, bathing my horse, watering my horse at shows, cooling my horse down, cleaning the stable floors and walls, washing out my horsebox, cleaning horse equipment and buckets as well as for non-equine use like washing the car. It is powered by a 18volt rechargeable battery which makes it fully portable and it only takes around an hour for the battery to fully charge. It is really lightweight to carry even when filled with water and it also has a padded comfortable shoulder strap making carrying easier. When in operation it is really quiet so it is great to wash down young or nervous horses and the nozzle is adjustable which offers different settings from a gentle spray/mist to a stream of water so you can change according to what job you are doing. It is really robust and is really well made which again is handy when working with horses. I now take the Nomad everywhere with me and I feel this is a real must have. Priced at £169.99 including a 1 year warranty, you can't afford not to have one!

Equetech Unity Check Breeches

These are absolutely stunning and extremely comfortable, I am very impressed! The jodhpurs have a lovely subtle over check in contrasting colours that make them so stylish and the material has a slight stretch to them making them easy to wear in and out of the saddle. They have a suede seat that gives you that added 'stay put' contact in the saddle, a comfort waistband and a handy zip pocket for your mobile phone or money. The jodhpurs have been made with attention to detail and priced from £64.95 are a real quality bargain. They offer a great fit and wash and dry well too – there are no bad points or anything I would change about these jodhpurs, they're great!
